PROJECTS

Piano Application(MERN Stack) - **GitHub Repo** - **piano-roll.vercel.app**   *Dec. 2022 – Dec. 2023*

- Developed a full-stack piano web app using TypeScript/React, HTML, CSS (front end), and Express.js (back end).
- Piano can be played using a QWERTY keyboard.
- Inputs can be recorded onto a note by time grid which also allows notes to be added via double clicking grid cells.
- Notes can be manipulated by using keyboard shortcuts. Note length and position can be adjusted using the shift and command/control keys.
- Implemented features allowing users to adjust grid subdivisions, tempo, volume, octave, measure amounts and more.
- Enabled MIDI file import/export functionality and user accounts for saving projects on a server.

Astro/Strapi Blog Website - GitHub Repo - blab-times.vercel.app   *April 2023 – November 2023*

- Not currently maintained because it is no longer in use.
- Developed a dynamic blog platform using Astro, Strapi, Supabase, and React with integrated cron jobs for automated tasks.
- Enabled users to create accounts, leave comments, like posts, and manage email subscriptions for post notifications.
- Built robust subscription functionality allowing users to easily subscribe and unsubscribe from email alerts for new content.
